INDEX TO VOLUME XI

Bailey, W. N. On the product of two associated Legendre functions 30
Best, E. A theorem on Hausdorff measure 243
Burchnall, J. L., and **Chaundy, T. W.** Expansions of Appell's double hypergeometric functions 249
Cartwright, M. L. On level curves of integral functions . . 277
Chaundy, T. W. Linear partial differential equations (II) . . 101
—— see **Burchnall, J. L.**
Christopherson, D. G. Note on the vibration of membranes . 63
Cowling, T. G. On certain expansions involving products of Legendre functions 222
Crum, M. M. Some inversion formulae 49
Daniell, P. J. Ratio tests for double power series . . . 183
Erdélyi, A. On some biorthogonal sets of functions . . . 111
—— On fractional integration and its application to the theory of Hankel transforms 293
Erdélyi, A., and **Kober, H.** Some remarks on Hankel transforms 212
Feldheim, E. Expansions and integral-transforms for products of Laguerre and Hermite polynomials 18
Forder, H. G. Kinematical relativity and textile geometry. . 124
Hua, Loo-Keng. On a theorem due to Vinogradow . . . 161
Ingham, A. E. On the estimation of $N(\sigma, T)$ 291
Jackson, F. H. The q^θ equations whose solutions are products of solutions of q^θ equations of lower order 1
Kober, H. On Dirichlet's singular integral 66
—— On fractional integrals and derivatives 193
—— see **Erdélyi, A.**
MacRobert, T. M. Some integrals involving Legendre and Bessel functions 95
Misra, R. D. On a new non-differentiable function . . . 225
Rado, R. The distributive law for products of infinite series . 229
Spain, B. A boundary problem 271
Taylor, P. R. The functional equation for Epstein's zeta-function 177
Titchmarsh, E. C. On expansions in eigenfunctions (II) . . 129
—— On expansions in eigenfunctions (III) 141
Walker, A. G. Certain groups of motions in 3-space of constant curvature 81
Watson, G. N. An inequality in the triangle 273
Whitrow, G. J. On the free paths in the substratum and the gravitational theory of the origin of cosmic rays 53
Wong, Yung-Chow. On the Frenet formulae for a V_m in a V_n . 146
Wright, E. M. The generalized Bessel function of order greater than one 36
